

## **ASTROLOGY REPORT**

### **SNAPSHOT OF KOFI ANNAN'S HOROSCOPE**

Every leader's horoscope has a unique planetary pattern that reflects the story of his or her life and the type of destiny he or she was born to fulfill, Indeed human destiny is reflected in the horoscope of man and if we can discern the planetary aspects and patterns properly we can use it as a guide post, something like a genuine blueprint that will be our counselor. Not many people have the privilege to come face to face with the reality of their birth chart which guides their life. We pray and hope that a time will come when men's life will be guided with the wisdom of the Stars. Indeed Astrology is now being used to analyze the psychological and emotional nature of a person and therefore those who have the tendency to violent mental triggers, suicidal tendencies and tendency to murder can all be identified and possibly helped before it get out of hands. Well The horoscope before us is the chart of a man who reflects a great magnetic personality, a man of great charisma, with a heart to carry all in his heart. It is the chart of a man whose heart sees into the heart of men and feel their pain as his own.

### **LIFE ASSIGNMENT OF THE SON'S OF DESTINY**

Like I said from the beginning his chart reflects a stellium of four planets with the Moon's south node, all in Taurus. Here we come face to face with the energy that was driving the world giant. His horoscope reflect someone with Aries on the ascendant but Taurus is intercepted in the first house with all these five planets and node inside, this Taurus indeed intercepted the personality and chose him to carry the burden of many on his shoulders. This was not an easy task but in this case a soul in this incarnation has been invited to bear this obligation and he ought to fulfill it anyway, the pattern of Stellium is associated with another strange pattern which reflects a kind of tug of war energies. The ruler of the chart is also seen among the Stellium and connected to Jupiter the Mythical Zeus in Aquarius, a mind that is bent on finding solutions to problems a strong and positive thought graced with Divine providence reflected in Uranus conjunction to Mars (the ruler) and these two planets are favorably in trine aspect to Neptune ( the vessel, a channel). Neptune is said to be the planet of Dvinity and a symbol of a medium through which spiritual energy can be channeled and Kofi Annan indeed served as a

conduit an instrument through which a sense of unity and understanding was built, of cause he was without his own faults as a human. Chiron the element which symbolises our wound has a frictional aspect with this Neptune and therefore his weaknesses will be seen coming from that side, the side that brought him pain and suffering when he see the limitations to what he can do

**THE ARROW OF GOD** There are many pointers or should I say symbols reflecting the hand of God behind the the thought of men who incarnate from time to time to serve the cause of humanity and Kofi Annan was one of such men. We thank God that such a man once walk and lived on the surface of the Earth and helped make the world a bit better than he met it, we see many such black leaders who gave their best for the world. This is why the world must know that all men must be treated equally no matter the colour of the skin or the language or where they come from.
